Amaryllis are beautiful flowering bulbs grown indoors during the winter months. They are very easy to care for! The recipient simply plants the bulb in the container with a small amount of soil that is included. The bulb will immediately grow lovely green stems and buds that unfurl into richly hued blooms, producing several large, spectacular flowers in approximately six weeks. Our bulbs are significantly larger than standard amaryllis bulbs available on the market. They radiate joy and delight for weeks, through Christmas and into the new year! Shipped with care instructions included. The exact colors of the blooms may vary.
